Benjamin Jones
 January the first 1860

ARGUMENTS FOR THE BIBLE. There are four grand arguments for the truth of the Bible. The first is the miracles on record; the second the prophecies; the third the goodness of the doctrine; the fourth the moral character of the penmen. The miracles flow from Divine power; the prophecies from Divine understanding; the excellence of the doctrine from Divine goodness; the moral character of the penmen from Divine purity. Thus, Christianity is built upon these four immovable pillars—the power, the understanding, the goodness, the purity of God. The Bible must be one of these things—either an invention of good men or good angels, or bad men or bad angels, or a revelation from God. But it could not be the invention of good men or angels, for they neither would nor could make a book telling lies at the time, saying, "Thus saith the Lord," when they knew it to be all their own invention. It could not be the invention of wicked men or devils, for they could not make a book which commands all duty, which forbids all sin, and which condemns their souls to all eternity. The conclusion is irresistible; the Bible must be given by Divine inspiration.—
 Bishop Simpson.

The New year of 1860 Commences with clear
 & cold weather wind from the North & Mary I
